# GCCBC2026

# Announcement

On behalf of the Organizing Committee, it is my great honor and pleasure to welcome you all to the 2nd Global Climate Change & Biodiversity Congress (GCCBC2026), taking place in the vibrant city of Paris, France, on May 4–5, 2026.

I am delighted to serve as Conference Chair for this meaningful event, which brings together global experts, policymakers, researchers, and visionaries to exchange ideas and foster innovative solutions to the pressing challenges of climate change and biodiversity loss.

Over the course of my professional journey, I have been privileged to contribute to advancing sustainable development, environmental resilience, and eco-innovation through collaborative research and international partnerships. These efforts reflect a shared commitment to protecting our planet's ecosystems, restoring biodiversity, and developing nature-based solutions that balance human progress with environmental stewardship.

Our collective vision for GCCBC2026 is to provide an open and collaborative platform for knowledge exchange—bridging science, policy, and practice. The congress will highlight pioneering research and technologies that address the urgent need for climate adaptation, renewable energy, sustainable agriculture, and biodiversity conservation.

This year's theme emphasizes the interconnectedness between environmental health and human well-being, encouraging participants to explore holistic approaches to sustainability. Paris, a city renowned for its cultural heritage, scientific innovation, and leadership in global climate initiatives, offers a fitting setting for such transformative discussions.

At GCCBC2026, we strive to unite science, innovation, and community action to address the urgent challenges of climate change and biodiversity loss. Our mission is to inspire collaboration across disciplines and regions, fostering solutions that promote environmental resilience and sustainability. Through collective knowledge and shared commitment, we aim to drive impactful change for both people and the planet. This congress serves as a global platform for dialogue, discovery, and the exchange of pioneering ideas.

Together, we can build a future where ecosystems thrive, and humanity coexists in harmony with nature.

Your participation and insights will be vital in shaping this vision toward a sustainable and biodiverse world.

I wholeheartedly invite each of you to immerse yourself in the vibrant program we have prepared—share your knowledge, connect with fellow pioneers, and together, let's shape the future of space science and exploration.

I look forward to welcoming you in person to an unforgettable experience in Paris!

## Topics:

- Biodiversity Conservation in Agro-Ecosystems
- Climate Adaptation & Resilience Sustainable Agriculture policy &
- Food Security
- Mitigation & Emissions Reductions Particle
- Carbon Reduction & Renewable Energy
- Environmental Policy & Molecular Ecology
- Biodiversity & Ecosystem Conservation
- Natural Hazards & Disaster Management
- Green Technology & Circular Economy
- Climate Policy, Finance, and NDCs
- Socio-Economic Dimensions of Climate Change
- Clean Energy Transitions & Decarbonization Strategies
- Climate-Resilient Agroforestry and Sustainable Crop Production
- Climate-Resilient Infrastructure and Hydrogen Fuel Cells
- Genetic Breeding & Livestock Sustainability
- Food Security & Sustainability
- Climate Change & Atmospheric Science
- Climate Agriculture & Plant Physiology
